CURRENT FEATURED ITEM (CONTINUED)

Using Your GPS Tracking Unit

1. Open the GPS packaging. Take the unit out of the box.

2. Remove the back and locate the serial number.

3. Complete the form that came with your GPS unit and send it via fax. (Or call the company.)

4. Place the batteries into the battery pack and reinsert into the GPS unit.

5. Hide the device in the trunk of the car you want to monitor.

6. Now, using the Internet (from any computer), you can monitor the actions of the vehicle you are tracking.

Note: Commercial units can be hard-wired.
